

What's new in our environmental initiatives?

Cole Engineering Group Ltd. is a registered member of the Canadian Green Building Council (CaGBC). With LEED® accredited professional staff, Cole Engineering is able to provide Clients with environmentally conscious engineering design.

Part of Cole Engineering's vision is to "add value and provide engineering solutions that enhance and grow our communities, while remaining good stewards of the earth and its' environment". In order to continually apply our vision, it is very important to remain at the forefront of environmental and sustainable technologies.

Having LEED® accredited professionals on staff gives Cole Engineering an enhanced awareness and knowledge of environmental design. In this era of environmental awareness and sustainability, Cole Engineering can look forward to providing its Clients with the latest environmental and sustainable services.

For more information on our services, please contact our office at (416) 987-6161.

Mission

The experience, knowledge and personal commitment of staff at Cole Engineering Group sets the benchmark for client satisfaction and excellence in providing engineering services.

Vision

Through technical expertise and innovation, we will provide efficient and fiscally responsible engineering solutions for the construction and management of transportation and municipal infrastructure. We will add value and provide engineering solutions that enhance and grow our communities, while remaining good stewards of the earth and its' environment.

Values

We recognize, respect and celebrate the excellence of our staff and bestow this energy and spirit upon our clients. Above all, we conduct ourselves with honesty and integrity while taking ownership of projects, and always being accountable to our clients and each other.
