CMP Engineering
A Division of Cole Engineering Group Ltd.
100 Renfrew Drive, Suite 100
Markham, ON L3R 9R6

To Whom It May Concern:

RE: CMP Engineering – A Division of Cole Engineering Group Ltd.

CMP Engineering is one of our top engineering consultants. Accordingly, I have no hesitation in recommending **CMP** as a company with which to do business.

Presently, **CMP** is undertaking the Preliminary Design, Detailed Design, Preparation of Tender & Contract Documents, Contract Administration and Site Inspection on three (3) watermain replacement projects for the Regional Municipality of Peel in the City of Brampton. The projects are valued at \$8.5M and involve replacement of existing watermains in an urban setting.

Gary Hatt, P.Eng. PMP is principal in charge of **CMP**'s linear infrastructure business line and was assigned project manager to Peel Region on the projects referred. It is a pleasure working with Gary as he is playing a very active role and genuinely cares for the projects and stakeholders. It is uncommon in this day of conglomerate engineering companies for senior staff named in proposals to actually spend time on the projects however I'm pleased to note this exception. Gary and his team are highly skilled, experienced and service oriented and they do put in the hours to attend to all the details.

Value added services are provided without prompting. As one example, **CMP** records and updates comprehensive lists of all resident concerns and circulates them regularly to the project team and stakeholders including the Region of Peel, City of Brampton and the Contractors. And follow up with residents is not a simple e-mail but a face-to-face visit by **CMP**'s senior field personnel. As a result I receive unsolicited e-mails and voice messages from residents expressing sincere satisfaction with how they have been treated.

All the sites are manned by experienced senior site inspectors. Field challenges are addressed promptly. Change orders are managed effectively. Contract administration is efficient. Close communications are maintained at every level and I am always apprised of progress.

Based on my experience, I would welcome **CMP** back to undertake future work and would highly recommend them to anyone else.

Yours truly,

Shaun Hussain, C.E.T., rcca.
